Omar Aboelmagd

DevOps Engineer

GitHub: neatphar
LinkedIn: neatphar
https://aboelmagd.me

An enthusiastic, ambitious DevOps Engineer who can easily adapt to new environments, learn new technologies, tools and frameworks. I have been able to thrive in both team-based or solitary work, always open to new ideas and strict with deadlines, and care about overall product.

Work Experience

ALDI DX — **JAN 2023 — PRESENT**
Software Engineer - IT Stores — *Mülheim an der Ruhr, Germany*

- Developed and maintained CI/CD pipelines for 40+ projects, automating build and deployment processes on-scale, which significantly improved efficiency and reduced errors.
- Automated parts of the release process to thousands of on-prem live servers worldwide using PowerShell, Python and GitLab CI/CD Pipelines, saving +200 hours of effort per year.
- Created and maintained a one-click disaster recovery system built in Bash for on-prem live systems supported with a backend written in Java and deployed on Serverless Azure Infrastructure by Terraform.
- Designed Grafana dashboards for real-time monitoring of GitLab CI/CD pipeline performance and health using InfluxDB, enabling proactive management and quick decision making.
- Implemented DocOps Pipelines for several projects that enforced updated documentation, as intended, on GitLab Pages.
- Migrated External Azure DevOps, GitHub Actions Pipelines into Internal GitLab CI/CD Pipelines following standard practices.
- Developed an automated credentials rotation internal system, enhancing security by ensuring automated creation and maintenance of access keys and passwords over common vendors across teams.
- Organized educational sessions on CI/CD, empowering other teams to create CI/CD pipelines for their products.

Raseedi, a Fin-Tech Startup — **JAN 2022 — JAN 2023**
DevOps Engineer — *Cairo, Egypt*

- Ensured availability of the company's event-driven products on AWS, as well as assessing emergencies, providing analysis, and recommending solutions.
- Migrated existing infrastructure on AWS into Terraform code in a highly available and scalable manner along with its documentation into a more secured networking setup.
- Automated the process of creating AWS AMIs using Packer and Ansible.
- Enhanced portability and reduced development overhead by containerizing back-end monolithic applications and microservices and isolating dependencies using Docker.
- Ensured adequate observability measured by shortened mean time to resolution (MTTR) to incidents by deploying Prometheus|Grafana|AlertManager and Elasticsearch|Logstash|Kibana stack to monitor live infrastructure.
- Reduced the AWS monthly bill by creating a detailed report using InfraCost and integrating it into an IaC CI/CD pipeline and moving Jenkins pipelines to be executed in Spot Instances.

Sprints — **AUG 2021 — OCT 2021**
DevOps Engineer Intern — *Cairo, Egypt*

- Set a unified Git workflow for the development process that was then used in a multibranch CI/CD Jenkins pipeline.
- Implemented CI/CD pipelines using Jenkins to automate the building process and deployment of a multicontainer MEAN stack web application and a Django web application across different development environments.

Skills

Cloud Platforms	AWS, DigitalOcean.
Tools and Languages	Docker, Kubernetes, Helm, Microservices with Kafka, Git, Linux, Bash, PowerShell, Python, GoLang, Java/Kotlin, SQL.
CI/CD Tools	Gitlab CI, Jenkins, CircleCI.
Infrastructure As Code	Terraform, CloudFormation, Packer.
Configuration Management	Ansible.
Artifact Management	Cloudsmith, Nexus.
Monitoring Tools	NewRelic, Prometheus, Grafana, Alertmanager, ElasticSearch, Logstash, Kibana, Datadog.
Keywords	AWS EC2, Load Balancer, RDS, EKS, ECS, VPC, Nginx, Reverse Proxy, Firewall, Kubernetes, Synthetic Monitoring, Immutable Infrastructure, DocOps, JIRA.

Education

Mansoura University, Egypt — **JAN 2022**
BSc. in Mechatronics Engineering with Honours | ***GPA:*** *3.9/4.0*

Certifications

AZ-900: Microsoft Azure Fundamentals | https://learn.microsoft.com/en-us/users/.../da4104f72ba49ee4 — **AUG 2023**
Professional Scrum Developer (PSD) | https://www.scrum.org/certificates/960717 — **MAY 2023**
