GitHub: neatphar
LinkedIn: neatphar

An enthusiastic, ambitious DevOps Engineer who can easily adapt to new environments, learn new technologies, tools and frameworks. I have been able to thrive in both team-based or solitary work, always open to new ideas and strict with deadlines, and care about overall product.

Work Experience

ALDI DX — **FULL TIME | JAN 2023 — PRESENT**
Senior Software Engineer - IT Stores — *since Sept 2025*
DevOps Engineer - IT Stores — *Mülheim an der Ruhr, Germany*

- Developed and maintained CI/CD pipelines for 40+ projects, automating build and deployment processes on-scale, which significantly improved developer efficiency and reduced errors.
- Created and maintained a disaster recovery solution for thousands of live on-prem systems in 10 countries supported with a back-end application written in Java and deployed on Serverless Azure Infrastructure by Terraform.
- Automated legacy release processes using Python, Bash, PowerShell and GitLab CI/CD Pipelines, saving +200 hours of human effort per year.
- Designed Grafana dashboards for real-time monitoring of GitLab CI/CD pipeline performance and health using InfluxDB, enabling proactive management and quick decision making.
- Supported the development of an automated credentials rotation internal system using GoLang, enhancing security by ensuring automated creation and maintenance of access keys and passwords over common vendors across teams.
- Implemented DocOps Pipelines for several projects that enforced proper documentation practices on GitLab Pages.
- Maintained a low-level Linux installation automation system, enabling reliable deployments across 50,000+ servers.
- Migrated Azure DevOps and GitHub Actions Pipelines into GitLab CI/CD Pipelines following standard practices.

Raseedi, a Fin-Tech Startup — **FULL TIME | JAN 2022 — JAN 2023**
DevOps Engineer — *Cairo, Egypt*

- Ensured availability of the company's event-driven products on AWS, as well as assessing emergencies, providing analysis, and recommending solutions.
- Migrated existing infrastructure on AWS into Terraform code in a highly available and scalable manner along with its documentation into a more secured networking setup.
- Automated the process of creating AWS Amazon Machine Images (AMIs) using Packer and Ansible.
- Enhanced portability and reduced development overhead by containerizing back-end monolithic applications and microservices and isolating dependencies using Docker.
- Ensured adequate observability measured by shortened mean time to resolution (MTTR) to incidents by deploying Prometheus|Grafana|AlertManager and Elasticsearch|Logstash|Kibana stack to monitor live infrastructure.
- Reduced the AWS monthly bill by 29% by recognizing inefficiencies via detailed reports created by InfraCost and integrating it into an IaC CI/CD pipeline.

Sprints — **AUG 2021 — OCT 2021**
DevOps Engineer Intern — *Cairo, Egypt*

- Set a unified Git workflow for the development process that was then used in a multibranch CI/CD Jenkins pipeline.
- Implemented CI/CD pipelines using Jenkins to automate the building process and deployment of a multicontainer MEAN stack web application and a Django web application across different development environments.

Skills

Cloud Platforms	AWS, Azure, DigitalOcean.
Tools and Languages	Docker, Kubernetes, Helm, Microservices with Kafka, Git, Linux, Bash, PowerShell, Python, GoLang, Java, SQL.
CI/CD Tools	Gitlab CI, Jenkins, CircleCI.
Infrastructure As Code	Terraform, CloudFormation, Packer.
Configuration Management	Ansible.
Artifact Management	Cloudsmith, Nexus.
Monitoring Tools	NewRelic, Prometheus, Grafana, Alertmanager, ElasticSearch, Logstash, Kibana, Datadog.
Keywords	AWS EC2, Load Balancer, RDS, EKS, ECS, VPC, Nginx, Reverse Proxy, Firewall, Kubernetes, Synthetic Monitoring, Immutable Infrastructure, DocOps, JIRA.

Education

Mansoura University, *BSc. in Mechatronics Engineering with Honours* | ***GPA:*** *3.9/4.0* — **MAR 2022**

Certifications

AZ-900: Microsoft Azure Fundamentals | https://learn.microsoft.com/en-us/users/.../da4104f72ba49ee4 — **AUG 2023**
Professional Scrum Developer (PSD) | https://www.scrum.org/certificates/960717 — **MAY 2023**
AWS Cloud Architect Nanodegree | https://www.udacity.com/certificate/.../ab05c9061b1b — **OCT 2022**
Advanced Cloud DevOps Engineer Nanodegree | https://www.udacity.com/certificate/.../c7c82dd6cefa — **APR 2022**
